PROJECTS

- MAIN PROJECT

STARTUP HEALTHY

2021 – 2022

A comprehensive solution for real time surveillance, care and support for people. This portal is a one stop platform for the public to avail emergency services and information related to Covid Pandemic and ensure transparency and quality in public services and welfare measures and to register the vaccination slots including covid vaccines and other vaccines (Polio, Hepatitis, etc.). Our project to be developed on Web Application and Android Application for users.
- MINI PROJECT

Website for Health Sector

2020 – 2021

The purpose of application in healthcare system is to develop and automated tool for identifying and disseminating relevant COVID -19 information. In this system we have presented a web based application for testing, find the result of a patient. In this project we describe about the matter of risk for the person who needs immediate remedies regarding their poor health. A user can search with a particular place and view the details of quarantine peoples, no of positive cases, no of recovery, and can collect the test results.
