PROJECTS

STARTUP HEALTHY - A Health Care App

Java / Android

2022

This project is to get connected with the Health Sector in one tap and act as a one stop platform to collect any vaccines and to collect the data's related to the pandemic in real-time.

Tasks

- This app enabled all users to book any type of vaccines irrespective of age and also can collect all the details about the pandemic in real-time
- Easily find out the nearby containment zones.
- This application helps to access with the Emergency services and also reserve the hospital resources like Beds, ICU Beds, Ventilators etc.

Care Early Corona Website for Health Sector Related to Pandemic

PHP / MySQL

2021

In this system we are presenting a web-based application that helps a user to contact with the hospital both in pandemic or not but more relevant in pandemic.

Tasks

- In this website a user can search with a particular place and view the details of quarantine peoples, no of positive cases, no of recovery.
- This website help a user to test his/her samples to find out the pandemic is present or not and can collect the results
- This website help the user to contact with the doctor also if he/she is identified as positive with the pandemic
